Package content can be altered to suit.
Available in Small Business and Enterprise Editions

ABM

ABM is a comprehensive accounting and business system designed to suit any industry. With next generation accounting technology and a long list of high powered features, ABM becomes the platform from which your business will run itself more efficiently and with less effort.

Particularly relevant is ABM's job costing and project management features, currently been used in today's construction industry. Included in the package are ABM's advanced functions, Project Invoicing and Subcontractor Claims, providing greater features and workflow for businesses in construction.

Job & Time Sheeting

Developed for professionals in all areas to allow greater ease and efficiency in recording time and disbursements costs against jobs. Included in the module is a cache of tools and mechanisms designed to improve integrative workflow in the accounting and business system.

Payroll

Unique in that it can trap costs by employee, job, cost centre and stage, and integrate these costs directly into the ABM accounting system. Within any one week employees can move between jobs and allocate correct costs to overhead accounts. The system focuses particularly on the needs of the construction industry.

**An integrated business and accounting solution
 for the Construction Industry**

"When selecting our accounting solution it was most important to select one that suited our industry and that would have proper on-going support. With this in mind we selected Advanced Business Manager accounting software a totally integrated solution, provided by Software Support Systems Ltd. It was refreshing to work with a company that understood our business and were able to provide valuable advice on the setup of the system."
