## ABM

ABM is a comprehensive accounting and business system designed to suit any industry. With next generation accounting technology and a long list of high powered features, ABM becomes the platform from which your business will run itself more efficiently and with less effort.

Particular features included in ABM, especially relevant to wholesale & distribution, are the stock control, sales & debtors control, and purchases & creditors control. Recognised as essential and brilliantly designed modules of ABM, with praise from users across the globe, they have become some of the many competitive advantages of ABM.

## Assets Management

Comprehensive tracking of all assets within your company. There is a great deal of flexibility in this software which remains simple to operate and caters for many different types and combinations of assets with extensive reporting and costing options available.

## Sales Forecasting

Instantly see an on-screen analysis of sales. This can be by customer, product, by salesperson, within periods to your specification and for your selected values of pricing, margin, volume and many more. An infinite variety of questions can be answered by mining the data.
